

HJHansen Climate and Environmental Policy

- | HJHansen Genvindingsindustri A/S, HJHansen Skive A/S, HJHansen Hadsund A/S and HJHansen Sverige AB (HJHG) contribute through their activities to a positive impact on the climate and the environment.
- | HJHG focuses on protecting the climate and the environment, including preventing pollution and reducing any negative impacts on the climate and the environment that may result from our activities.
- | HJHG seeks to maintain a constructive dialogue with authorities, neighbours and other stakeholders, including regarding our environmental conditions.
- | Environmental legislation and other binding obligations must be complied with at all times.
- | An up-to-date emergency preparedness plan must be in place and followed in the event of unintended incidents that involve a risk of pollution.
- | Through product and process development, efforts are made to recover as much material as possible while ensuring the best possible use of resources.
- | HJHansen is committed to continuous improvements in relation to climate and environmental performance. Climate and environmental objectives will be established and will be evaluated on an ongoing basis.
- | Through procedures within a certified management system, HJHansen ensures that work processes are carried out with the greatest possible consideration for the climate and the environment.
- | The management system, which is certified in accordance with DS/EN ISO 14001:2015, is continuously improved in order to enhance climate and environmental performance..

Departments Covered

- | All departments and all activities within HJHG are covered by the occupational health and safety policy as well as the climate and environmental policy.

Management Commitments

- | To ensure that the climate and environmental policy is understood and complied with throughout the company.
- | To ensure that the management system is effective.
- | To ensure that the necessary resources, including qualified personnel and relevant equipment, are available throughout the organisation so that the climate and environmental objectives can be achieved.
- | To ensure that the management system is reviewed at appropriate intervals.
- | To ensure that the climate and environmental policy and associated objectives are aligned with the company's framework, operating conditions and strategic direction.
- | To communicate the importance of complying with the requirements of the management system and to ensure that the intended results are achieved.
- | To promote continuous improvements in the areas of climate and environmental performance.
